PROFILE SUMMARY

Software Systems undergraduate with hands-on experience in full-stack web and mobile application development, software testing, and business analysis. Skilled in building database-driven systems, REST API integrations, responsive user interfaces, and scalable applications using modern technologies. Passionate about Agile development, QA processes, and solving real-world problems through technology.

TECHNICAL SKILLS

- Programming: Java, Python, JavaScript, C, Dart
- Web & Mobile Development: HTML, CSS, React, Flutter
- Database & APIs: MySQL, REST APIs
- Tools & Platforms: Git, GitHub, Postman, Jira, Trello, VS Code, Android Studio
- Software Engineering: OOP, UI/UX Basics, Agile/Scrum
- Testing & QA: Manual Testing, API Testing, Bug Reporting, Test Case Design
- Business Analysis: Requirement Gathering, Requirement Analysis, User Stories, Workflow Analysis
- Modeling & Management: UML, Use Case Diagrams, Agile Project Management
- Language: Sinhala, English

SOFT SKILLS

- Problem Solving & Critical Thinking
- Communication & Team Collaboration
- Leadership & Entrepreneurship
- Time Management & Adaptability

PROJECTS

NetWatch — Network Traffic Monitoring Dashboard | Python, Flask, SQLite

Developed a real-time network monitoring dashboard for analyzing traffic, bandwidth usage, and suspicious activity.

- Built live packet monitoring and analytics using Scapy and Flask
- Implemented interactive dashboards and anomaly detection features

- Developed REST APIs, reporting, and filtering functionalities

LAN Chat & File Sharing Platform | Python, Flask, Socket.IO

Developed a real-time LAN communication and file-sharing platform using WebSocket technology.

- Implemented real-time messaging and secure file sharing
- Designed chat rooms with persistent SQLite message storage
- Built responsive multi-device interface with notification features

Canteen Ordering System | PHP, MySQL, JavaScript

Developed a multi-canteen food ordering platform with automated order management workflows.

- Implemented secure email verification and PIN-based order collection
- Designed customizable ordering and real-time order tracking features
- Developed staff dashboard, menu management, and analytics functionalities

Lost and Found Web Application | HTML, CSS, JavaScript, MySQL

Developed a full-stack lost-and-found management system for posting and managing item records.

- Implemented CRUD operations, search filtering, and database functionalities
- Designed responsive user interfaces with dynamic data handling
- Applied requirement analysis to improve system usability

RESEARCH

Mobile AI Performance Optimization (Ongoing Research)

- Researching mobile AI optimization using Flutter and TensorFlow Lite.
- Analyzing latency, memory usage, and inference performance on mobile devices.

ENTREPRENEURIAL EXPERIENCE (2024 – PRESENT)

- Founder — **LYCAN Menswear**: Managed branding, online sales, operations, and customer engagement.
- Co-Founder — **HMS Mart**: Operated an online electronics business handling product sourcing and sales.
- Co-Founder — **3SP Fashion**: Supported e-commerce operations, marketing, and product management.

EDUCATION

Bachelor of Information and Communication Technology (Hons)

University of Kelaniya | 2023 - Present

Specialization: Software Systems

Current GPA: 3.60 / 4.00
